

Roman Villarreal Artist

Bio

I was born and raised in this beautiful city called Chicago. My community is South Chicago. I am highly respected and considered at the forefront of the arts movement here. When artistic endeavors are considered, I am brought in for consultation in regards to artistic merit and professionalism. The neighborhood it's self brings inspiration to my work and provides more than enough materials for my art.

Over the years I studied by myself from the "old Masters" and at the same time working on my own style as a painter of life in the Inner-City. I feel I will do this till my last. I have painted in every form and style. But my main subject in life is the "Barrio". To capture some of the good with the bad these are the things that this artist has seen looking out his studio.

I feel that my main motivation is that I'm doing something that I was always meant to do.... ART.

I am a Sculptor and Painter. Using the visual aspects of my surroundings, I create sculptures and paintings that tell the hystory and life of South Chicago.
